

SALESFORCE DEVELOPER

PROJECT TITLE : WORKFORCE ADMINISTRATION SOLUTION

TEAM ID : NM2023TMID0250

TEAM MEMBERS

PAVITHRA M (611420104054)

DHIVYABHARATHI A (611420104018)

JAYASHREE T (611420104026)

NANDHINEESWARI D (611420104047)

COLLEGE SPOC

MANIMEGALAI M , M.E

FACULTY MENTOR

KOWSALYA N , M.E

APEX - APEX TRIGGERS - FLOWS – AUTOMATION

Apex Triggers: These are pieces of code that execute before or after records are inserted, updated, or deleted in Salesforce. They allow you to perform complex logic and operations during these events.

Flows: Flows are declarative automation tools. They allow you to design and automate business processes by creating flows that guide users through screens and perform operations in the background. Flows are often used for creating wizards, collecting data, or automating repetitive tasks.

Together, Apex triggers and flows provide a comprehensive approach to automation in Salesforce, combining the flexibility of code (Apex) with the ease of use and visual design of flows.
